ENDEAVOR × VYOMA

THE NEXT DEFENCE DOMAIN.

Space is now a national security priority.

MEET VYOMA

European space intelligence.
A new strategic partnership.

01 / NATIONAL SECURITY

SPACE IS A DEFENCE DOMAIN.

NATO recognises space as an operational domain. Military capability on Earth increasingly depends on assets in orbit.

01

SECURE COMMS

Connect command and deployed forces.

02

NAVIGATION

Positioning, navigation and timing.

03

INTELLIGENCE

Support awareness and decision-making.

04

EARLY WARNING

Support threat detection and response.

Vyoma helps monitor the orbital environment these systems rely on.

WHO IS VYOMA?

MUNICH, GERMANY • FOUNDED IN 2020

Vyoma builds Space Domain Awareness capabilities for governments, space commands and satellite operators.

01

OBSERVE

Space-based optical sensors

02

ANALYSE

Detect changes and manoeuvres

03

INFORM

Intelligence for security decisions

03 / ORBITAL INTELLIGENCE

KNOW WHAT MOVES IN ORBIT.

CONCEPTUAL TRACKING VISUAL

Monitoring objects of interest and changes in satellite behaviour helps decision-makers understand potential risks.

01 **DETECT**

Identify new and uncatalogued objects.

02 **TRACK**

Follow selected satellites and manoeuvres.

03 **ASSESS**

Analyse proximity and pattern-of-life changes.

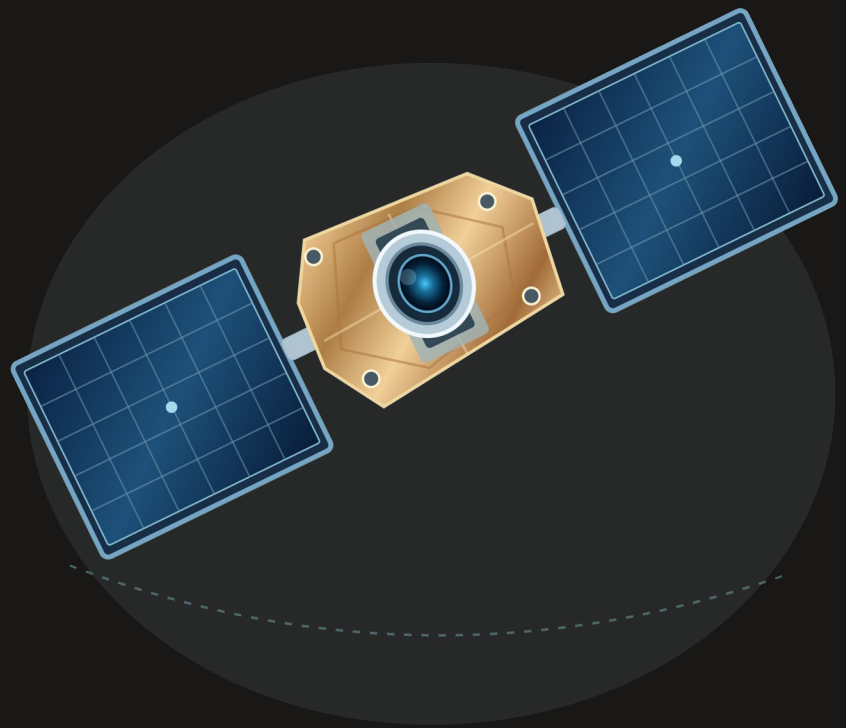

FLAMINGO-1 IS OPERATIONAL.

11 JAN 2026

Launched into orbit

29 OCT 2026

Routine operations

Conceptual satellite illustration

WHAT IT DOES

Observes objects of interest, detects manoeuvres and supports space-threat awareness.

EUROPE NEEDS ITS OWN EYES.

Sovereign orbital intelligence reduces dependence on outside sources of space-domain information.

2

EUROPEAN DEFENCE FUND

Vyoma was awarded two EDF projects in 2024.

EMISSARY + STAALION

Focused on space security, intelligence sovereignty and threat response.

European security needs a trusted, independent picture of activity in orbit.

FROM FIRST SATELLITE TO SPACE NETWORK.

Vyoma plans a growing sensor network designed for faster, more independent awareness of activity in orbit.

2026
FLAMINGO-1
Operational today

2027
FLAMINGO-2
Launch planned for Q1

2028–29
FLAMINGO-3 TO 12
Additional satellites planned

SUB-HOURLY
Target revisits for LEO objects at full 12-satellite deployment.

ENDEAVOR AT THE NEXT DEFENCE FRONTIER.

Officially representing Vyoma in

GREECE & CYPRUS.

Connecting European space intelligence technology with the region's evolving defence and security requirements.
